Amit Maheshwari, Chief Executive Officer, i-Vantage, Inc.

Mr. Maheshwari has the unique experience and perspective of playing major roles as a manager, provider, and consultant in the offshore sourcing model over the past ten years for companies such as Automatic Data Processing (ADP), General Electric, and Baxter Healthcare.

As CEO of i-Vantage, Mr. Maheshwari helped set 'offshoring' strategies for ADP and provided consulting on offshore based software engineering to Baxter Healthcare. He managed several development offshore projects as a manager at General Electric.

Mr. Maheshwari developed and implemented i-Vantage's unique offering called *Global InServe*, that enables companies to rapidly establish their own offshore subsidiaries and bypass traditional outsourcing alternatives to more quickly and fully reap the benefits of offshore operations. The i-Vantage approach permits companies to gain the cost savings of offshore operations without relinquishing control and paying additional fees to an outsourcer. Some of i-Vantage's customers include ADP, Baxter, GE, St. Croix Systems, SupplyForce and Scholastic Toys.

Prior to i-Vantage, Mr. Maheshwari was a senior technology strategy consultant at Mainspring, Inc. (acquired by IBM) where he helped technology companies reduce their operating costs with simpler technology platforms and outsourcing their R&D operations to India. Previous to Mainspring, Mr. Maheshwari was a director at GE Medical Systems responsible for large global software development and implementation projects. Prior to General Electric, Mr. Maheshwari worked as a software engineer at M&I Data Services (Now MetaVante, Inc.); a Mid-Western data-processing company.

Mr. Maheshwari has led technology projects in the United States, France, Singapore, Japan, and India, and has worked with major Indian outsourcers such as Tata Consultancy Services, Wipro InfoTech, Mascot Systems, and Satyam Computers.

Mr. Maheshwari is on the board of directors of Aquatic Treatment Systems India Ltd, Transgene i-V Biotechnology Ltd., and St. Croix Systems Corporation. He holds a B.S. in Computer Engineering from Marquette University, WI, and is a certified Six Sigma quality professional, and has two patents pending in the field of information technology.
